## Converted Organics™

### SOIL START 6-1-1

SoilStart® 6-1-1 is marketed as an all natural commercial fertilizer whose nutrients are derived from corn steep liquor solids. SoilStart® 6-1-1 has been formulated to provide the grower with an effective combination of slow and quick release nitrogen for pre-plant applications. SoilStart® 6-1-1 is suitable for use on both organic and conventional agricultural soils.

**Row Crops, Tree/Vine Crops:**

For typical applications, it is recommended that SoilStart® 6-1-1 be sidedressed or soil incorporated at a rate of 300 to 700 lbs. per acre. It is further recommended that this product be applied early in the growing season to allow sufficient time for product breakdown and availability of nitrogen. Dosage and application rates may vary for each crop.

**Lawn & Garden application:**

Apply 50 lbs. of SoilStart® 6-1-1 per 3,000 sq. ft. of area. Water after fertilizing and keep turf moist for 3 to 4 days. Apply 2 to 4 times per year. Your local conditions and results may require you to modify application rates.

Converted Organics, LLC makes no warranty or condition, express, implied or statutory, whatsoever, with respect to the product's condition, performance or its adequacy for the Purchaser's purpose or uses, which extend beyond the use of the product under normal conditions in accordance with the statements made on this label.

## Converted Organics™

### XK 2 - 2 - 4

Converted Organics™ XK is marketed as a natural fertilizer whose nutrients are derived from corn steep liquor and sulfate of potash. Converted Organics™ XK has been formulated to provide the grower with a high quality, fully pasteurized liquid fertilizer suitable for use on a variety of crops. Converted Organics™ XK contains a readily available source of potassium and is recommended for the promotion of plant vigor, development of a sturdy root system and for the forming of protein in plants. Converted Organics™ XK is recommended for use on both organic and conventional agricultural soils.

#### APPLICATION RECOMMENDATIONS

- **Lawn & Garden application:**  
10-20ml per gallon of water.
- **For a seasonal total of 100 gallons per acre (gpa) use a combination of the following methods:**

	Field/Row Crops (gpa)	Tree/Vine Crops (gpa)
Broadcast	15-20	15-20
Water run/sprinkler	20-50	15-25
Micro-irrigation	5-15	5-15
Under seed	5	--
Side dress	10-20	10-15

Converted Organics, LLC makes no warranty or condition, express, implied or statutory, whatsoever, with respect to the product's condition, performance or its adequacy for the Purchaser's purpose or uses, which extend beyond the use of the product under normal conditions in accordance with the statements made on this label.
